London Southend Airport Compensation Bulletin Dated 12th July 2014

The airport operators have offered to pay for insulation works to some of our clients situated in Southend Road Rochford to mitigate the effects of the runway extension.

We have asked for another meeting with the airport operator's surveyors and requested that we disclose such discussions to our clients. As you know the last meeting was confidential at the request of the airport operators.

We have noted with interest discussions arising from exchanges between Gatwick and Heathrow airports for an additional runway. In particular we noted a university paper stating that the noise level at which the public perceive such noise to be a nuisance is significantly lower than previously thought.

We are grateful for the anecdotal written evidence of diminution of value received from our clients and we shall be pleased to receive any further evidence from those clients who have not yet made a submission.

Further bulletins will be issued whenever there is any substantial information to report.
